Garden measurement packet

Student copy. Distribute only the student activity.

Student activity

Read Table 1, then use Figure 1 to compare the measurements.

Table 1. Garden observations

Plant	Start height (cm)	End height (cm)
Bean	4	10
Pea	6	9

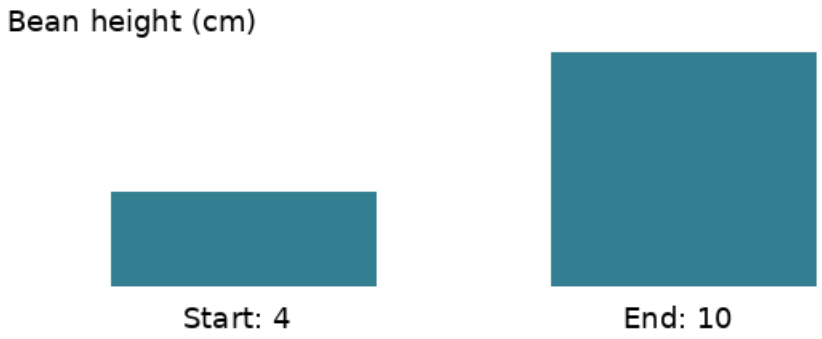

Figure 1. Bean height changes from 4 cm to 10 cm.

Q1. How many centimeters did the bean grow? Show the subtraction.

Q2. Which plant grew more? Use both differences.

Explain your reasoning.

Teacher guide

Teacher copy. Keep this complete answer key separate from student distribution.

Answer key

Table 2. Worked answers

Item	Worked answer	Common error
Q1	10 - 4 = 6 cm.	Subtracting in reverse order.
Q2	Bean: 6 cm; pea: 3 cm. Bean grew 3 cm more.	Comparing final heights instead of growth.

Rubric: 1 point for each correct difference; 1 point for comparison with units.

Explain your reasoning.
